### MEDIUM VOLTAGE CABLES

# APPENDIX

1

This product catalog contains only a small selection of our Medium Voltage Cables. We have more than 3500 cables in stock for daily delivery, so if you need something in this catalog, you can always find it at www.scankab.com.

You can also do as many of our other customers, and contact us at +45 7020 3455.

| MEDIUM VOLTAGE CABLES                      | VOLTAGE                 | PAGE |
|--|-------------------------|------|
| X-VOLT <sup>®</sup> PEX-AL-ST              | 12 kV                   | 4    |

# **MEDIUM VOLTAGE CABLES** The Backbone of Reliable Power Distribution

At Scankab Cables, we take pride in being a trusted manufacturer of high-quality medium voltage cables that meet the exacting standards of our customers.

#### **Produced with Precision and Care**

Our medium voltage cables are manufactured using state-of-theart technology and strict quality control processes to ensure optimal performance and durability.

We use only the highest quality materials, including top-grade copper and aluminum conductors, insulating materials, and protective sheaths.

Our cables are designed to withstand harsh weather conditions, corrosive environments, and extreme temperatures.

#### Applications of Medium Voltage Cables

Medium voltage cables are used in a variety of applications, including power distribution networks, underground cabling, and industrial facilities.

They are ideal for providing reliable and efficient transmission of electricity over long distances, and are often used to connect power stations to substations, as well as to distribute power to large industrial complexes, office buildings, and residential areas.

#### Scankab Cables: The Perfect Manufacturer

At Scankab Cables, we have a long history of providing high-quality medium voltage cables to a range of industries.

Our team of experts has the knowledge and experience necessary to produce cables that meet the specific needs of our customers.

We offer a wide range of medium voltage cables, including single-core, three-core, and multi-core cables, each designed to meet different requirements.

### Medium and high voltage cables

### X-VOLT<sup>®</sup> PEX-AL-ST - 12 KV

#### **Application:**

Medium Voltage aluminium cable PEX-AL-ST for the transport and distribution networks, power plants, transformer units, connection between overhead lines and transformers. This cable can be installed in ducts, direct buried or in the open air.

#### **Construction:**

| Conductor:       | Aluminium, class 2 acc. to IEC 60228   |
|------------------|--|
| Insulation:      | Cross-linked polyethylene type DIX 12 according to HD 620-1  |
| Conductor color: | Black with white numbering,  |
| Screen:          | Strippable screen over the insulation, made of<br>thermosetting semiconductor material.<br>Metallic screen with longitudinal water tightness made of a<br>concentric layer of copper wires with one helically wound<br>copper<br>tape over hygroscopic tape helically. |
| Outer sheath:    | Polyethylene type DMP 13 according to HD 620-1, red  |

#### **Technical data:**

| Working temperature: | -15° C to +90° C                         |
|----------------------|--|
| Rated voltage:       | 12 kV                                    |
| Bend radius:         | 15 x cable diameter                      |
| Technical comments:  | Short circuit temp.: max 250° C / 5 sec. |

#### Approvals:

HD 620-10 D, IEC 60228, IEC 60754-1, IEC 60754- 2, IEC 60502-2, CE, RoHS

#### Properties and installation:

### X-VOLT<sup>®</sup> PEX-AL-ST - 12 KV

### Medium and high voltage cables

### X-VOLT<sup>®</sup> PEX-AL-CT - 12 KV

#### **Application:**

Medium Voltage aluminium cable PEX-AL-CT for the transport and distribution networks, power plants, transformer units, connection between overhead lines and transformers. This cable can be installed in ducts, direct buried or in the open air.

#### **Construction:**

| Conductor:       | Aluminium, class 2 acc. to IEC 60228   |
|------------------|--|
| Insulation:      | Cross-linked polyethylene type DIX 12 according to HD 620-1  |

able Product

### X-VOLT<sup>®</sup> NORDIC TSLF, single - 6/10 (12) kV AXLJ-F TT - PEX-AL-S-LT

#### **Application:**

X-VOLT<sup>®</sup> NORDIC TSLF is used for medium voltage installations or distribution networks both indoors and outdoors.

Ex. for the supply of transformer stations, infrastructure, wind turbines, solar parks, factory plants, data centers along with others.

#### **Construction:**

|               |  | 11 |
|---------------|--|----|
| Conductor:    | Aluminium, cl. 2<br>Hygroscopic tapes applied in order to achieve longitudinal<br>watertightness<br>Conductor screen: cross-linked semiconductor screen (triple-<br>extrusion) |    |
| Insulation:   | Cross-linked polyethylene, DIX8<br>Insulation screen: cross-linked semiconductor screen (triple-<br>extrusion)   |    |
| Screen:       | Screen of Cu threads and metal tape  |    |
| Outer sheath: | PE, DMP 17, black  |    |

#### **Technical data:**

| CPR classification:  | E <sub>ca</sub>          |
|----------------------|--------------------------|
| Bend radius:         | 15 x kabeldiameter       |
| Rated voltage:       | 6/10 (12) kV (Uo/U (Um)) |
| Working temperature: | -15° C to +90° C         |

Please request for DoP at dop@scankab.dk

#### **Approvals:**

EN 50575, IEC 60754-1/2, HD 620-10K

#### **Properties and installation:**

Low emission of corrosive gases acc. to IEC 60754

Max. working temp. +90° C

Medium voltage cable

### X-VOLT<sup>®</sup> NORDIC TSLF, single - 18/30 (36) kV AXLJ-F TT - PEX-AL-S-LT

#### **Application:**

X-VOLT<sup>®</sup> NORDIC TSLF is used for medium voltage installations or distribution networks both indoors and outdoors.

Ex. for the supply of transformer stations, infrastructure, wind turbines, solar parks, factory plants, data centers along with others.

#### **Construction:**

|               |  | 10 |
|---------------|--|----|
| Conductor:    | Aluminium, cl. 2<br>Hygroscopic tapes applied in order to achieve longitudinal<br>watertightness               | Q  |
|               | Conductor screen: cross-linked semiconductor screen (triple-<br>extrusion)                                     |    |
| Insulation:   | Cross-linked polyethylene, DIX8<br>Insulation screen: cross-linked semiconductor screen (triple-<br>extrusion) |    |
| Screen:       | Screen of Cu threads and metal tape  |    |
| Outer sheath: | PE, DMP 17, black  |    |

**Technical data:** 

| CPR classification:  | E <sub>ca</sub>           |
|----------------------|---------------------------|
| Bend radius:         | 15 x cable diameter       |
| Rated voltage:       | 18/30 (36) kV (Uo/U (Um)) |
| Working temperature: | -15° C to +90° C          |

**CPR classification:** 

Please request for DoP at dop@scankab.dk

#### **Approvals:**

EN 50575, IEC 60754-1/2, HD 620-10K

#### **Properties and installation:**

Max. working temp. +90° C

Medium voltage cable

### X-VOLT<sup>®</sup> NORDIC TSLI, (3x) - 18/30 (36) kV

#### **Application:**

X-VOLT<sup>®</sup> NORDIC TSLI is used for medium voltage installations or distribution networks both indoors and outdoors.

Ex. for the supply of transformer stations, infrastructure, wind turbines, solar parks, factory plants, data centers along with others.

#### **Construction:**

| Conductor:    | Aluminium, cl. 2<br>Hygroscopic tapes applied in order to achieve longitudinal<br>watertightness<br>Conductor screen: cross-linked semiconductor screen (triple-<br>extrusion) |
|---------------|--|
| Insulation:   | Cross-linked polyethylene, DIX8<br>Insulation screen: cross-linked semiconductor screen (triple-<br>extrusion)   |
| Screen:       | Screen of Cu threads and Cu tape   |
| Outer sheath: | PE, DMP 17, black  |

#### Technical data:

| CPR classification:  | D <sub>ca</sub> -s1a, d2, a1 |
|----------------------|------------------------------|
| Bend radius:         | 15 x cable diameter          |
| Rated voltage:       | 18/30(36) kV (Uo/U (Um))     |
| Working temperature: | -15° C to +90° C             |

Please request for DoP at dop@scankab.dk

#### Approvals:

EN 50575, IEC 60754-1/2, HD 620-10K

#### Properties and installation:

Max. working temp. +90° C

Medium voltage cable

### X-VOLT<sup>®</sup> RHZ1-OL, AL - 12/20 (24) kV

#### Application:

 $\rm X-VOLT^{\degree}$  RHZ1-OL, AL is used for medium voltage installations or distribution networks both indoors and outdoors.

Ex. for the supply of transformer stations, infrastructure, wind turbines, solar parks, factory plants, data centers along with others.

#### **Construction:**

| Conductor:    | Aluminium, class 2 acc. to EN 60228/IEC 60228<br>Semiconducting layer around the conductor                       |
|---------------|--|
| Insulation:   | XLPE. Semiconducting layer around the isolation. Easy strippable   |
| Screen:       | Screen of Cu threads and hygroscopic tape  |
| Outer sheath: | Halogen free polyolefine type DMZ1 acc. to 620-1 and type ST7 acc. to IEC 60502-2, red                           |
| Comments:     | Optional: Hygroscopic tape is made to achieve longitudinal watertightness on the conductor, type X-VOLT RHZ1-20L |

#### Technical data:

| Working temperature:    | -15° C to +90° C                         |
|-------------------------|--|
| Rated voltage:          |  |
|                         | 12/20(24) kV (Uo/U (Um))                 |
|                         |  |
| Bend radius:            | 15 x cable diameter                      |
| Technical comments:     | Short circuit temp.: max 250° C / 5 sec. |
| Approvals:              |  |
| IEC 60754-1, IEC 60228  | , IEC 60502-2, UNE 211605, CE, RoHS      |

 $\rm X-VOLT^{\degree}$  RHZ1-OL, AL is used for medium voltage installations or distribution networks both indoors and outdoors.

Ex. for the supply of transformer stations, infrastructure, wind turbines, solar parks, factory plants, data centers along with others.

#### **Construction:**

| Conductor:    | Aluminium, class 2 acc. to EN 60228/IEC 60228<br>Semiconducting layer around the conductor                       |
|---------------|--|
| Insulation:   | XLPE. Semiconducting layer around the isolation. Easy strippable   |
| Screen:       | Screen of Cu threads and hygroscopic tape  |
| Outer sheath: | Halogen free polyolefine type DMZ1 acc. to 620-1 and type ST7 acc. to IEC 60502-2, black                         |
| Comments:     | Optional: Hygroscopic tape is made to achieve longitudinal watertightness on the conductor, type X-VOLT RHZ1-20L |

| Working temperature:                        | -30° C to +90° C   |

NA2XS(FL)2Y is used for installation in ground, in water, outdoors, indoors and in cable ducts for power stations, industry, and distribution networks. The high mechanical durability of the PE-sheath permits strong mechanical stress during installation or during operation. The water blocking tape avoids water propagation inside the cable.

#### **Construction:**

## **QUALITY YOU CAN COUNT ON:** The rigorous testing behind Scankab Cables' X-VOLT<sup>®</sup> Medium Voltage Cables!

At Scankab Cables, we understand the importance of quality when it comes to Medium Voltage Cables. That's why we subject our X-VOLT<sup>®</sup> cables to numerous tests at every stage of the manufacturing process to ensure that they meet our high standards.

The testing process starts with the raw materials, as we carefully inspect and test each material upon receipt to ensure that they meet our strict requirements. During the production process, we carry out extensive testing to ensure that each step meets the necessary standards.

Once the production process is complete, we conduct a final round of tests on the finished product. Our testing procedures follow the IEC 60502-2 and HD 620-10C methods, which define the main testing standards for Medium Voltage Cables.

These tests include various measurements of the cable's properties, such as insulation resistance, conductor resistance, voltage withstand, and cable dimension. We also conduct environmental tests, including exposure to elevated temperatures, humidity, and mechanical stress, to ensure that the cable can withstand harsh conditions.

Our commitment to quality testing ensures that our X-VOLT<sup>®</sup> cables meet the highest standards of performance and safety.

When you choose Scankab Cables for your Medium Voltage Cable needs, you can trust that you are getting a reliable and high-quality product that will perform consistently over time.

# **UNLEASH THE POWER** of our X-VOLT<sup>®</sup> Cables:

### WHERE TO USE OUR MEDIUM VOLTAGE CABLES!

Scankab Cables' X-VOLT<sup>®</sup> range of Medium Voltage Cables is engineered to meet the demands of various industries and applications.

Our cables are suitable for use in distribution networks, renewable energy sources such as wind turbines, solar energy systems, Power-to-X, airports, tunnels, and railway infrastructures.

In the industrial sector, X-VOLT<sup>®</sup> cables are commonly used for power transmission and distribution, motor connections, and as control cables. Our cables are designed to withstand high levels of mechanical stress, making them ideal for use in harsh industrial environments.

In transportation infrastructure, our X-VOLT<sup>®</sup> cables are perfect for use in tunnels and airports, where safety and reliability are critical. Our cables are also commonly used in railway infrastructures for power transmission, signaling, and communication.

For renewable energy sources, X-VOLT<sup>®</sup> cables are perfect for connecting wind turbines and solar panels to the power grid and for use in Power-to-X. Our cables are capable of handling the high voltage levels and power transmission requirements of these systems.

No matter where you need reliable and efficient power transmission, you can count on Scankab Cables' X-VOLT<sup>®</sup> range of Medium Voltage Cables to deliver the performance you need.

#### Scankab set out as the cable indu**str**y's answer to "garage rock"

From the outset in 1992, Scankab was the rebel of the cable industry. The business sold cables from a small garage store room and challenged the cable market. Today, it is still part of the company's DNA to set new standards for the industry.

Scankab develops, manufactures and supplies quality cables and cable management to electrical contractors, industry, marine & offshore, infrastructure and energy. The range includes more than 3500 stocked cable types. Scankab has its head office and warehouse in Aarup in Funen and its subsidiaries in Norway and Sweden.
